CUSTOMER TALK

SAP Gold Partner

Committed to Serve Customer Better

> " "It's incomparable between the old system and the SAP Business One. Now you just need to press a button whenever you want to see finance report"

Cirelus Hartono - Managing Director
PT. Innoware Indonesia

innoware pt. innoware indonesia

With **SAP Business One** the management could monitor and manage every essential aspect in the company more effective. Thus, decision-making process should be faster.

PROBLEM

- ✓ Manual and island like administration using Excel
- ✓ Data reliability
- ✓ No collaboration platform between departments
- ✓ To get accurate and real time inventory data
- ✓ Double input to process sales and delivery order

SOLUTION

- ✓ Implement financial, sales, inventory and purchasing modules
- ✓ Automate reporting to headquarter

BENEFIT

- ✓ Significant change in processs integration and collaboration
- ✓ Improved data quality
- ✓ Data readiness is much faster and real time
- ✓ Data can be accessed from anywhere
- ✓ Transform Accounting role from clerical to reviewer

In less than five years, Innoware manages to become one of the most significant plastic packaging and container manufacturers in Indonesia. Its products has scored of national and multinational companies trust. The company also successfully expanded their market abroad.

Integrated Solutions System for Real Time Data ●

Before using SAP Business One, Innoware Indonesia had different system installed in its main office, factory and warehouse. "Each was independent, disintegrated and not online," Hartono says about the problem Innoware had with the old system.

Partnering with PT Soltius Indonesia ●

After the company decides to implement SAP Business One, the company then decided to partner with PT Soltius Indonesia. Looking at Soltius Indonesia proven track record, Hartono is convinced because Soltius is part of Metrodata Group.

Innoware Indonesia applied six modules in implementing SAP Business One, which are purchase module, sales module , inventory module , banking module, financial module and production module . In the production module, soL:dAllocation is used to automatically read just the allocation of cost from the main product to by-product. In inventory module the soL:dConvert is used to do 1 step conversion conversion of grade to batch, and vice versa.

What happened when the system 'go live'? ●

Everything is real time and integrated. With the current single system everything from monitoring warehouse stock, production capacity, distribution allocation, sales to financial condition is available. Things that took quite a long time to check, such as checking production and sales report, can now be done instantly.

With SAP Business One the management could monitor and manage every essential aspect in the company more effective. Thus, decision-making process should be faster. With the implementation of SAP Business One in his company, Hartono is more convinced to continue Innoware Indonesia's business motto, "Committed to Serve You Better".
