

# CUSTOMER TALK

## IMPROVED PERFORMANCE WITH INTEGRATED SYSTEM

“This is the main reason we implement SAP Business One, to make better coordination between departments and inventory control. With SAP Business One, everything is done instantly. We can check the inventory anytime, which is different with the previous time that made us have to wait. Now the inventory can be accessed real time”

- Suparno  
Senior Manager Finance & Accounting

**SAP Business One** is expected to bring a more effective business process to PT Topla. The expectation is fulfilled. Once **SAP Business One** officially goes live at PT Topla, business process gets more efficient and integrated. could provide better control to customer service.

## PROBLEM

- ✓ Manual and island like administration using Excel
- ✓ Data reliability
- ✓ No collaboration platform between departments
- ✓ To get accurate and real time inventory data
- ✓ Double input to process sales and delivery order

## SOLUTION

- ✓ Implement financial, sales, inventory and purchasing modules
- ✓ Automate reporting to headquarter

## BENEFIT

- ✓ Significant change in process integration and collaboration
- ✓ Improved data quality
- ✓ Data readiness is much faster and real time
- ✓ Data can be accessed from anywhere
- ✓ Transform Accounting role from clerical to reviewer

PT Topla Abadi Jaya is one of the leading companies in electronic and automotive components manufacturing with experience over 20years in Indonesia. PT Topla is part of the RP Topla Group, a Japanese based manufacturing company. Beside Indonesia, RP Topla Group production bases are located in Malaysia, Vietnam and Thailand.

### Long-term engagement with IT

PT Topla has a good perspective in using IT. Before SAP Business One is implemented, PT Topla used the Microsoft Excel for its financial report and accounting. PT Topla wanted to go further by applying a more advance IT system to optimize business process in the company. For this, PT Topla decided to use SAP Business One. Once SAP Business One officially goes live at PT Topla, business process gets more efficient and integrated.

With the SAP Business One, the stages are not much different but it takes shorter time. If goods came in, for example, The inventory people will simply input the item and the data needed is ready.

With improved data reliability, PT Topla is very optimistic to grow further and to be among the best player in the business. The target set by the company such as improving profit margin and cut losses could easily met. In the near time the company even planned to buy new machines to boost production capacity.

### Applying Four Modules

There are four SAP Business One modules adopted by PT Topla, which are sales, purchasing, inventory and finance. The implementation program was fast and without any problems. It took 40 days for the implementation process and we went live in April 2014.

“Soltius gave the best assistance and was very communicative. They know our needs and willing to listen. Anything that our management wants was fulfilled. When the implementation is done and the system went live, Soltius remain to give guidance. Anytime we face problem, Soltius is always easy to contact and available,” says Suparno.
